Satyam Sonakul

Pune, Maharashtra | 9373995719 | sonakulsatyam@gmail.com | LinkedIn | GitHub | LeetCode

Summary

Full-Stack and AI developer experienced in **MERN** applications, **REST APIs**, and **LLM/RAG** systems. National-level hackathon winner with Google UX certifications and strong data structures and OOP fundamentals. Seeking internship and full-time AI and Full-Stack roles.

Education

Anantrao Pawar College of Engineering & Research — Pune
B.E. Information Technology, CGPA: 9.32 — *Aug. 2025 – Expected 2028*

Government Polytechnic — Pune
Diploma, Computer Engineering, Percentage: 87.87% — *Aug. 2022 – May 2025*

Priyadarshini English School — Pune
SSC, Percentage: 95% — *Completed 2022*

Experience

MERN Stack Development Intern — May 2024 – July 2024
Career Fortune IT Solutions — *Pune, Maharashtra*

- Executed full-stack web development using the **MERN stack** (MongoDB, Express.js, React.js, Node.js)
- Enhanced multiple web applications, including an **e-commerce platform** and a **travel booking application**
- Engineered **RESTful APIs** and integrated frontend interfaces with backend services
- Planned, developed, and deployed full-stack projects in a collaborative team

Virtual Job Simulations (3 Completed)
Forage

- Solved business-driven data science tasks in the **BCG X** Data Science Job Simulation
- Analyzed quantitative problems in the **J.P. Morgan Chase & Co.** Quantitative Research Job Simulation
- Leveraged generative AI for business analytics tasks in the **Tata** GenAI-Powered Data Analytics Job Simulation

Projects

ShopSmart AI – Full-Stack E-Commerce with ML Recommendations | *React, Vite, Node.js, Express, MongoDB, Mongoose, Python, Flask, scikit-learn, TF-IDF, Playwright*

- Designed a responsive **full-stack shopping application** with product discovery, filtering, cart and wishlist management, reviews, order history, and an admin dashboard for catalog and order management; engineered transactional checkout with server-side price and stock validation
- Implemented **secure authentication** with strong password hashing, MongoDB-backed sessions, CSRF protection, role-based access control, and rate limiting; built a **Flask ML service** using TF-IDF and cosine similarity with weighted user interaction history for explainable recommendations and budget-aware natural-language search

Phantom Load – Home Energy Audit Application | *React 19, Vite, Recharts, Node.js, Express, MongoDB, JWT, Google Gemini API*

- Engineered a **full-stack application** that lets households record appliances room by room, estimate electricity consumption and monthly costs, and identify standby-power waste through interactive Recharts dashboards
- Integrated the **Google Gemini API** as an AI advisor delivering tailored energy-saving guidance; secured user accounts with JWT authentication and password hashing; tested with Playwright and ESLint

Scan My Notes – GenAI & RAG System | *LLMs, Ollama, Vector DB*

- Designed an **LLM-based application** to query private datasets using **RAG architecture**, tuning prompts and vector search for accurate responses
- Architected a system for academic knowledge retrieval and AI assistants

Skills

Languages: Java, Python, C/C++, SQL, JavaScript, HTML/CSS
Frameworks and Libraries: React, Vite, Node.js, Express.js, Flask, Tailwind CSS, Mongoose, scikit-learn
Databases & Technologies: MongoDB, SQL, jQuery, Bootstrap, REST APIs, JWT, Google Gemini API
Developer Tools: Git, Google Cloud Platform, VS Code, Visual Studio, Jupyter, Postman, Docker, Playwright
Concepts: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Software Development
AI / Systems: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Vector Databases, LLM Prompting, Recommendation Systems
UI Skills: Sitemaps, User Flows, Typography, Color Theory, Wireframing, Prototyping, Visual Hierarchy
UX Skills: User Research, User Experience, Information Architecture, Usability Testing

Achievements

- Secured **1st Prize** among 40 teams at a national-level hackathon, Dr. D. Y. Patil Institute of Technology (Mar 2026)
- Qualified as **National Finalist** among 1,150+ teams and placed **2nd** among 85+ teams at the NLPC-26 project competition, Dr. D. Y. Patil Institute of Technology (Apr 2026)
- Earned **Runner-Up (2nd Prize)** in the IT Department (all four years) at a national-level hackathon, Anantrao Pawar College (Sep 2025)

Certifications

UX Design Process, Google (Jan 2025)
Foundations of User Experience (UX) Design, Google (Nov 2024)
HTML – Advanced, Infosys Springboard (Sep 2024)
Prompt Engineering for Developers, Infosys Springboard (Aug 2024)
SQL and Relational Databases 101, Cognitive Class (Jan 2024)
